Hinrich Foundation essays, authored

In 2019, despite strong headwinds

Huawei's rapid rise has amplified long-standing assertions about its connection to the Chinese state, and its role as a proxy for the CCP's technonationalist agenda. In Washington, China hawks – and even moderates – have reached a consensus that Huawei has benefited, either directly or indirectly, from the CCP's techno-

received by Finland's Nokia Corp, the world's second largest manufacturer

CASE STUDY

# India and Huawei

world's geopolitical axis away from  
a US and EU-centric world order and  
towards its own state-centric model.

Another company that exemplifies the tectonic shift in the technology landscape is Da-Jiang Innovations (DJI), the Chinese maker of civilian drones. Founded in 2006 by Frank Wang, a mainland Chinese student who studied

SPOTLIGHT

# Huawei, TSMC and American techno-nationalism

semiconductor company, for infringing

These heavily affected companies will need to map a future that navigates both a tenuous in-China-for-China techno-nationalist landscape, as well as one that focuses on next generation

advan
